

Alpine Stalker SERIES

AST75-75Litre Rucksack

Custom designed for tough Australian hunting conditions, this rucksack is equally suited to short or extended duration hunting trips and is the most fully featured hunting pack available on the market. Proudly loaded with Australian ingenuity, the Alpine Stalker 75 has many unique design features previously unavailable to backpack hunters.

The multiple custom designed storage pockets and straps together with a streamlined profile will get you through the bush and into and out of camp with a minimum of hangups. The symmetrical design and compression strap layout keeps the pack compact and close to your body, and the unique harness and padding system provides a level of comfort second to none. All of these features combined provide correct posture and balance for the hunter, and when out on the hill with a fully laden pack this translates to maximum strength, performance and efficiency as well as dramatically reducing fatigue.

The Moroka.30 AST75 has everything the hunter needs to store their kit, trophies and meat, and make the inevitably tough pack in and out over rough terrain, as comfortable and smooth as possible.
